 Zhu S, Heo M, Plankey M, Faith MS, Allison DB. Associations of Body Mass Index and Anthropometric Indicators of Fat Mass and Fat Free Mass with All-cause Mortality among Women in the First and Second National Health and Nutrition Examination Surveys Follow-up Studies, 286-293

Subject Index

A

Adiposity

- and body mass index, mortality, 286–293
- measures of, as predictors of CRP and IL-6, in women, 674–682
- visceral, assessment study design, 211–217

African Americans

- Black Women's Health Study, nutrient estimates, 111–118
- bone mineral density as mortality predictor, 692–697
- dehydration in black and white older adults using diuretics, 525–529
- genetic epidemiology of insulin resistance and visceral adiposity, 211–217
- intimate partner violence and depression, in three ethnic groups, 661–665
- lung cancer risk in black and white smokers, 294–302
- modeling community-level effects on preterm birth, 377–384
- risk of hip fracture in elderly breast cancer survivors, 698–703
- survival in obese end stage renal disease patients, 136–143
- unemployment and early breast tumor detection, 8–15

Agent Orange, TCDD levels and thyroid function in US Vietnam Veterans, Air Force Health Study, 335–343

Age-specific rates, partial SMR approach to smoothing, 89–99

Aging, *see* Elderly

Agriculture workers

- assessing silica dust exposure, 385–392
- exposure to pesticides and cancer, 1–7

AIDS surveillance data

- reliability, 100–104
- site selection and confidentiality (letter to editor), 78–79

Air Force Health Study, TCDD levels and thyroid function in US Vietnam Veterans, 335–343

Alcohol

- and chronic kidney disease, 712–720
- coffee and liver cirrhosis mortality, 419–423
- driver-dependent risk factors for causing vehicle collisions, Spain, 509–517

Alzheimer's Disease, prevalence in three ethnic groups in South Florida, 472–478

American College of Epidemiology Annual Meeting

- abstracts, 559–596
- cancer, 559–564
- chronic disease, 565–571

environmental/occupational, 571–573

health services, 573–577

infectious disease, 577–583

methods, 583–586

outcomes research, 586–589

pediatrics, 589–592

reproductive health, 592–596

forum report: doctoral education and training, 552–556

president's address, 545–548

program, 557–558

tribute to Abraham Lilienfeld, 549–551

American Indians, *see* Strong Heart Study

Angiotensin I-converting enzyme (ACE), physical and cognitive functioning and survival in elderly, 57–65

Anthropometry, comparison of indexes in predicting cardiovascular risk factors, Hong Kong, 683–691

Antibiotic resistance, antibiotic prescribing for cystitis, 479–483

Asthma

maternal, and risk of preterm birth, 267–272

and obesity, sex–race differences, 666–673

and physical inactivity, influence stress and depression, 358–368

prevalence among pregnant and childbearing-age US women, 317–324

Atherosclerosis

genetic epidemiology of insulin resistance and visceral adiposity, 211–217

ox-LDL-antibodies and daily wine consumption in older Italians, 189–195

Atherosclerosis Risk in Communities Study

quantifying association between occupational and leisure physical activity, 351–357

risk of QT prolongation with hormone replacement therapy, 530–536

B

Behavioral Risk Factor Surveillance System, relationship between obesity and asthma, sex–race differences, 666–673

Belgrade Childhood Diabetes Study, association of infections and vaccinations on diabetes, 645–651

Biomarker studies, optimal design, 204–208

Bioterrorism, need for more epidemiologists (President's Address), 545–548

Birth defects, maternal serum B₁₂ levels and risk for neural tube defects, 81–88

- Birth weight
and prenatal exposure to organochlorine compounds, 151-157
sociodemographic factors, Russia, 599-605
- Blood, sodium levels in old serum specimens, 178-181
- Blood pressure, lifestyle modification to control, 462-471
- Body mass index
adiposity, mortality, 286-293
and chronic kidney disease, 712-720
comparison of anthropometric indexes in predicting cardiovascular risk factors, Hong Kong, 683-691
- Bone mineral density, as mortality predictor, 692-697
- Breast cancer
assessment of NHIS-based method of measuring community socioeconomic status, 721-726
elderly survivors, risk of hip fracture, 698-703
geographic variation in Connecticut, 42-49
international comparison of survival, 32-41
risk, association with obesity and height, Nigeria, 455-461
unemployment and early tumor detection, 8-15
- Breast disease, benign, PBB and PCB exposure, smoking, 16-23
- Breast feeding, and infant health, 431-435
- C**
- Caffeine, traits of decaffeinated coffee drinkers, 272-279
- Calcium
coronary artery, risk factor for coronary artery disease, 163-169
Women's Health Initiative, calcium-vitamin D trial, overview, S98-S106
- Canada-US comparison, breast cancer survival, 32-41
- Cancer (see also Breast cancer; Melanoma)
death, occupational exposure to chlorinated organic solvents, 652-660
epidemiologic studies of occupational pesticide exposure, 1-7
gastric, dietary risk in Japanese women, 24-31
incidence with periodontitis, 312-316
lung, comparison of risk for black and white smokers, 294-302
mortality studies of occupational solvent exposure, 50-56
prostate, misattribution as cause of death in New Mexico, 450-454
rectal, risk and black tea consumption, 405-411
smoking cessation and renal cell carcinoma, 245-251
testicular, association with sexually transmitted disease (letter to editor), 541-542
- Cardiovascular disease
effects of isolated post-challenge hyperglycemia on mortality, 182-188
risk factors, comparison of anthropometric indexes to predict, Hong Kong, 683-691
- Case-parental control study, potential for gene-gene confounding, 261-266
- Cataract, relationship to hormonal status, France, 638-644
- Cause of death, misattribution to prostate cancer in New Mexico, 450-454
- Chemical manufacturing industry, occupational risk factors for leukemia, Shanghai, 485-494
- Children (see also Preterm birth)
association of infections and vaccinations on diabetes, 645-651
breastfeeding and infant health, 431-435
cohort study, Collaborative Perinatal Project: history, methods, contributions, 303-311
prenatal exposure to organochlorine compounds and birth weight, 151-157
sociodemographic factors in fetal growth, Russia, 599-605
- Chlamydia pneumoniae*, risk for myocardial infarction, 170-177
- Church of Jesus Christ of Latter-day Saints (LDS), health doctrine, impact on death from diseases of cigarette smoking, 704-711
- Cluster analysis, breast cancer, 42-49
- Coffee
and liver cirrhosis mortality, 419-423
traits of decaffeinated drinkers, 272-279
- Cognition, diabetes mellitus and cognitive performance, in women, 613-619
- Cognitive impairment, prevalence of dementia in three ethnic groups in South Florida, 472-478
- Cohort study (see also Women's Health Initiative)
Collaborative Perinatal Project: history, methods, contributions, 303-311
vegetable consumption and long-term survival in Italian men, 424-430
- Collaborative Perinatal Project, history, methods, contributions, 303-311
- Community influences
assessment of NHIS-based method of measuring community socioeconomic status, 721-726
intimate partner violence and depression, in three ethnic groups, 661-665
modeling, risk of preterm birth, 377-384
neighborhood context and self-rated health, older Mexican Americans, 620-628
- Condom use, psychometric analysis of data, 344-350
- Control group, traits of decaffeinated coffee drinkers, conflicting effects on risks, 272-279
- Coronary artery disease, risk factors and coronary artery calcium, 163-169
- C-reactive protein (CRP)
and IL-6, measures of adiposity as predictors of, in women, 674-682
risk for myocardial infarction, 170-177

- Cystitis, antibiotic prescribing for, 479-483
Cytomegalovirus, risk for myocardial infarction, 170-177
- D**
Daycare, and infant health, 431-435
Dehydration, in black and white older adults using diuretics, 525-529
Dementia
 prevalence in South Carolina, capture-recapture methodology, 518-524
 prevalence in three ethnic groups in South Florida, 472-478
Denmark, longitudinal study of elderly twins, 57-65
Department of Health and Human Services (DHHS), scientific dissent (Editorial), 597-598
Depression
 association with HIV infection, in prisons, 606-612
 influenced by asthma and physical inactivity, 358-368
 and intimate partner violence, in three ethnic groups, 661-665
Desiccation, sodium levels in old serum specimens, 178-181
Diabetes mellitus
 association with cognitive performance, in older women, 613-619
 effects of isolated post-challenge hyperglycemia on mortality, 182-188
 genetic epidemiology of insulin resistance and visceral adiposity, 211-217
 medications, impact on physical and cognitive functioning, older Mexican Americans, 369-376
 role of childhood infections and vaccinations, 645-651
Dialysis, survival in obese end stage renal disease patients, 136-143
Diet
 black tea consumption and rectal cancer risk, 405-411
 Black Women's Health Study, nutrient estimates, 111-118
 Dietary folate or multivitamin folic acid, risk of neural tube defects, 412-418
 differences between caloric requirements and dietary self-report, in women, 629-637
 familial aggregation of nutrient intake and physical activity, 128-135
 fatty acids, Seventh-day Adventist study, 119-127
 risk of gastric cancer in Japanese women, 24-31
 traits of decaffeinated coffee drinkers, 272-279
 vegetable consumption and long-term survival in Italian men, 424-430
 Women's Health Initiative, calcium-vitamin D trial, overview, S98-S106
 Women's Health Initiative, dietary modification trial, overview, S87-S97
Dioxin, TCDD levels and thyroid function in US Vietnam Veterans, 335-343
Dissent, scientific, and DHHS (Editorial), 597-598
Diuretics, dehydration in black and white older adults using, 525-529
Domestic violence, and depression, in three ethnic groups, 661-665
Drugs
 antibiotic prescribing for cystitis, 479-483
 antidiabetic, impact on physical and cognitive functioning in older Mexican Americans, 369-376
 marijuana use and injury hospitalizations, 230-237; Erratum 393
Dry cleaners, occupational exposure to solvents and mortality, 50-56
Dust, assessing silica dust exposure among farm workers, 385-392
- E**
Earthquake, Taiwan, effects on mortality, 502-508
Echocardiography, as epidemiological tool in Strong Heart Study, 238-244
Education
 epidemiologist education and training, 552-556

- Myocardial infarction, infection, C-reactive protein, and risk for, 170-177

N

- National Children's Study, legacy of Collaborative Perinatal Project, 303-311
- National Health and Nutrition Examination Survey (NHANES)
 - I, Epidemiologic Follow-up Study
 - bone mineral density and mortality, 692-697
 - periodontitis and cancer incidence, 312-316

- I and II, follow-up in women, adiposity and body mass index, mortality, 286-293
- National Health Interview Survey (NHIS), new method of measuring community socioeconomic status, 721-726
- Natural disaster, Taiwan earthquake, seismic deaths and post-earthquake mortality changes, 502-508
- Netherlands, survey non-response effects on prevalence estimates and associations, 105-110
- Neural tube defects
effect of dietary folate and multivitamin folic acid use, 412-418
maternal serum B₁₂ levels and risk for, 81-88
- Nigeria, obesity and height and breast cancer risk, 455-461
- Non-response, effects on prevalence estimates and associations, 105-110
- Nonsteroidal anti-inflammatory drugs (NSAIDs), hypotension, invasive Group A Streptococcal disease (letter to editor), 543-544
- Norway, coffee and liver cirrhosis mortality, 419-423
- O**
- Obesity
and asthma, sex-race differences, 666-673
comparison of anthropometric indexes in predicting cardiovascular risk factors, Hong Kong, 683-691
measures of adiposity as predictors of CRP and IL-6, in women, 674-682
and risk of breast cancer, 455-461
risk factor trends for lifestyle-related diseases, Geneva, 537-540
survival in end stage renal disease patients, 136-143
- Occupational health
assessing silica dust exposure among farm workers, 385-392
dry cleaners' exposure to solvents, and mortality, 50-56
exposure to chlorinated organic solvents, and cancer death, Taiwan, 652-660
farmers' exposure to pesticides, and cancer, 1-7
job characteristics, measures, relationship to health outcomes, 325-334
physical activity, occupational, quantifying association with leisure activity, 351-357
risk factors for leukemia, Shanghai, 485-494
stressors, influence of asthma and physical inactivity on stress and depression, 358-368
- Organochlorine
prenatal exposure and birth weight, 151-157
prenatal exposure and preterm birth, 158-162
- P**
- Periodontitis, and cancer incidence, 312-316
- Pesticides
occupational exposure and cancer, 1-7
prenatal exposure to organochlorine compounds and birth weight, 151-157
and preterm birth, 158-162
- Physical activity
familial aggregation of nutrient intake and physical activity, 128-135
inactivity and asthma, influence stress and depression, 358-368
occupational, quantifying association with leisure activity, 351-357
risk factor trends for lifestyle-related diseases, Geneva, 537-540
- Polybrominated biphenyl (PBB) exposure, and risk of benign breast disease, 16-23
- Polychlorinated biphenyl (PCB) exposure, and risk of benign breast disease, 16-23
- Postmenopausal women, *see* Women's Health Initiative
- Pregnancy
Collaborative Perinatal Project: history, methods, contributions, 303-311
dietary folate or multivitamin folic acid, risk of neural tube defects, 412-418
loss, early, role of stress, 223-229
maternal asthma prevalence, 317-324
maternal asthma and risk of preterm birth, 267-272
maternal serum B₁₂ levels and risk for neural tube defects, 81-88
modeling community-level effects on preterm birth, 377-384
prenatal exposure to organochlorine compounds and birth weight, 151-157
and preterm birth, 158-162
sociodemographic factors in fetal growth, Russia, 599-605
- PREMIER, clinical trial design, lifestyle modification for blood pressure control, 462-471
- Preterm birth
maternal asthma and risk of, 267-272
modeling community-level effects on, 377-384
and prenatal exposure to organochlorine compounds, 158-162
- Prevalence estimates, effects of survey non-response on, 105-110
- Prisons, association of psychiatric disorders and HIV infection among inmates, 606-612
- Prostate cancer, misattribution as cause of death in New Mexico, 450-454
- Prostheses, complications following testicular implant, 73-77
- Psychometric analysis, use for epidemiologic data, 344-350
- Pyelonephritis, acute, risk factors for in-hospital mortality, 144-150
- Q**
- QT prolongation, risk with hormone replacement therapy, 530-536

- Questionnaire (*see also* Food Frequency Questionnaire)
non-response bias, 105-110
telephone interviews compared to in-person interviews,
with memory aids, 495-501

R

- Rectal neoplasm, risk and black tea consumption, 405-411
Reliability, telephone interviews compared to in-person
interviews, with memory aids, 495-501
Religion, LDS health doctrine, impact on death from dis-
eases of cigarette smoking, 704-711
Renal cell carcinoma, and smoking cessation, 245-251
Renal disease, end stage, survival in obese patients,
136-143
Risk assessment
dietary factors and gastric cancer, 24-31
lung cancer, comparison of black and white smokers,
294-302
occupational exposure to pesticides and cancer, 1-7
occupational exposure to solvents, 50-56
prenatal exposure to organochlorine compounds
and birth weight, 151-157
and preterm birth, 158-162
Risk factors
associated with whiplash injury, 66-72
acute pyelonephritis in-hospital mortality, 144-150
cardiovascular, comparison of anthropometric indexes to
predict, Hong Kong, 683-691
coronary artery disease, and coronary artery calcium,
163-169
driver-dependent risk factors for causing vehicle colli-
sions, Spain, 509-517
monitoring trends, lifestyle-related diseases, Geneva,
537-540
for myocardial infarction, 170-177
obesity and height for breast cancer, 455-461
occupational, for leukemia, 485-494
screening secondary diagnoses of hospital medicare
claims to identify, 443-449
Russia
black tea consumption and rectal cancer risk, 405-411
sociodemographic factors in fetal growth, Russia,
599-605

S

- San Antonio Family Heart Study, familial aggregation of
diet and physical activity, 128-135
Schizophrenia, association with HIV infection in prisons,
606-612
Self-inflicted injury, and marijuana use, 230-237; Erratum
393
Sexually transmitted disease (STD), and risk of testicular
cancer (letter to editor), 541-542
Shanghai, occupational risk factors for leukemia,
485-494

- Silica dust exposure, assessing, among farm workers,
385-392

Smoking

- cessation, and renal cell carcinoma, 245-251
and chronic kidney disease, 712-720
LDS health doctrine, impact on death from diseases of
cigarette smoking, 704-711
lung cancer risk in black and white smokers, 294-302
periodontitis and cancer incidence, 312-316
risk factor trends for lifestyle-related diseases, Geneva,
537-540
risk of benign breast disease, 16-23

- Sodium, concentration in old serum specimens, 178-181

Solvents

- chlorinated organic, occupational exposure and cancer
death, Taiwan, 652-660
occupational exposure and mortality, 50-56
occupational risk factors for leukemia, Shanghai,
485-494

- Spain, driver-dependent risk factors for causing vehicle
collisions, 509-517

- Specimens, aged, sodium concentration, 178-181

- Standardized mortality ratio (SMR), partial SMR approach
to smoothing age-specific rates, 89-99

Statistical analysis

- estimating means with multivariate composite estimat-
ing concept, 280-285
sample size in biomarker studies, 204-208

- Streptococcal disease, invasive group A, nonsteroidal anti-
inflammatory drug use, hypotension (letter to editor),
543-544

Stress

- influence on early pregnancy loss, 223-229
influenced by asthma and physical inactivity, 358-368

Strong Heart Study

- echocardiography as epidemiological tool, 238-244
effects of isolated post-challenge hyperglycemia on mor-
tality, 182-188
estimating means, multivariate composite estimating
concept, 280-285

- Surveillance, classification of leptospirosis as probable
versus confirmed, 196-203

Surveillance data, AIDS

- reliability, 100-104
site selection and confidentiality (letter to editor), 78-79

Sweden

- birth cohort effects in multiple sclerosis, 252-260
factors associated with whiplash injury, 66-72

T

Taiwan

- earthquake effects on mortality, 502-508
exposure to chlorinated organic solvents and cancer
death, 652-660

- Tea, black, consumption and rectal cancer risk, 405-411

Testicular prostheses, complications following implant, 73-77

2,3,7,8-Tetrachloro-dibenzo-p-dioxin (TCDD), thyroid function in US Vietnam Veterans, 335-343

Thyroid function, in US Air Force Vietnam Veterans, 335-343

Tobacco control and prevention, *see* Smoking

Toxicology, pesticides, 1-7

Transplants, renal, survival in obese end stage renal disease patients, 136-143

Trends, monitoring, major risk factors for lifestyle-related diseases, 537-540

Twins, physical and cognitive functioning and survival in elderly, 57-65

U

Ukraine, prenatal exposure to organochlorine compounds and birth weight, 151-157

Ultraviolet A and B radiation, different roles in melanoma mortality rates, 395-404

Unemployment, and early breast tumor detection, 8-15

V

Vaccinations, and childhood infections, and risk of diabetes, 645-651

Validation

Food Frequency Questionnaire

Black Women's Health Study, nutrient estimates, 111-118

Seventh-day Adventist study, dietary fat, 119-127

NHIS-based method to measure community socioeconomic status, 721-726

Vegetable consumption, and long-term survival in Italian men, 424-430

Veterans, US Air Force, Vietnam, TCDD levels and thyroid function, 335-343

Vitamin B₁₂, maternal levels and risk for neural tube defects, 81-88

Vitamin D, Women's Health Initiative calcium-vitamin D trial, overview, S98-S106

W

Whiplash injuries, risk factors, 66-72

Wine consumption, and ox-LDL-antibodies in older Italians, 189-195

Women's health (*see also* Breast cancer; Pregnancy; Women's Health Initiative)

adiposity and body mass index, mortality, 286-293

antibiotic prescribing for cystitis, 479-483

asthma prevalence among pregnant and childbearing-age US women, 317-324

Black Women's Health Study, nutrient estimates, 111-118

diabetes mellitus and cognitive performance, in women, 613-619

hormonal status and cataract, France, 638-644

Japan, dietary risk of gastric cancer, 24-31

measures of adiposity as predictors of CRP and IL-6, 674-682

PBB and PCB exposure and risk of benign breast disease, 16-23

risk of QT prolongation with hormone replacement therapy, 530-536

survival in obese end stage renal disease patients, 136-143

Women's Health Initiative

baseline summary, S1-S4

calcium-vitamin D trial, overview and baseline characteristics of participants, S98-S106

dietary modification trial, overview and baseline characteristics of participants, S87-S97

differences between caloric requirements and dietary self-report, 629-637

implementation of study design, biomarkers, quality assurance, methods, S5-S17

Observational Study, overview, baseline characteristics of participants, baseline measure reliability, S107-S121

outcomes and adjudication methods, S122-S128

postmenopausal hormone trials, overview and baseline characteristics of participants, S78-S86

recruitment methods and results, S18-S77
